

To our Students, Instructors and Community:

California is currently in Phase 2 of reopening businesses. At this time, my in-person studio will be reopening! I am so excited about this and I thank you all for your patience during this time!

Health and safety are the main concerns as I prepare to reopen my space. I am working to restore all of the workshops that are on the schedule for this year, and implementing ways to keep everyone safe!

In the spirit of moving forward I would like to share with you the guidelines that will be implemented upon returning. It is my hope that you will stand along side us (myself and the instructors coming to teach) and support us in these measures to insure the safety of all.

What I am doing:

- Masks or face coverings are required for anyone entering the studio. There is a patio area right out in front that you are welcome to go out to and take a break from the studio and mask, or you are welcome to work out in front of the studio (outside) without your mask. However, if you are inside, a mask will be required.
- Max capacity numbers have been revised to follow social distancing for artists, instructors, visitors, etc.
- All frequently used surfaces are being disinfected and cleaned regularly.
- All equipment has been sanitized and will continue to be cleaned between student usage
- Hand sanitizer and wipes are available to students to use.
- 6-foot social distancing will be followed in the classroom.

What I ask of you:

- Wear your mask/face covering while inside the studio.
- Stay home if you feel sick. Do not come to the studio.
- Conduct self-screenings throughout the day - if you or someone around you exhibits symptoms of illness: fever, cough, shortness of breath, or other indicators you /they should leave and seek medical attention.
- Do not gather in one place – entrances, doorways, front desk, etc.
- Wash your hands with soap and water and use the hand sanitizer regularly, especially after touching frequently used items or surfaces.

- Avoid touching your face.
- Cover your cough or sneeze, cough into a tissue, or the inside of your elbow.
- Please follow the procedures set in order to create a safe environment for all.

Our website is updated regularly with a complete guide on re-opening and moving forward during this time. We also encourage you to visit the [CDC's website](#).

We thank you for your support and understanding and we look forward to seeing you soon.
